ATTACK & DEFEND

NEXT GENERATION APPLICATION SECURITY TRAINING PLATFORM

Learn and Never Forget

Attack & Defend is the only platform where teams learn critical threats, attacks, and countermeasures, then prove they can apply them in the real world.   Similar to flight simulators, it provides an authentic environment to hone skills after classroom or online training.

Computer Based Training (CBT)
Beginner to Expert; C Suite to Developer

Vulnerabilities are mistakes your development teams are making, but don't need to be. Our eLearning courses help them get it right the first time around and reduce enterprise risk.

Features:
- 120 courses; 50+ specific to coding
- Covers all major roles, platforms and technologies
- Maps to dozens of standards and frameworks
- Modular, interactive and engaging
- Customer Success Team maximizes ROI

CMD+CTRL Cyber Range
Exploit and Win

Featuring 7 business applications and over 400 vulnerabilities of varying difficulty, CMD+CTRL tempts players to purchase items for free, discover their bosses salary and conduct other nefarious acts – and learn critical skills while doing so!

Features & Benefits:
- Authenticity makes security fun but real
- SaaS-based so no infrastructure to maintain
- Real-time scoring and surprises keep players engaged
- Detailed reports measure organizational preparedness
- Run hacking events for cross functional team building
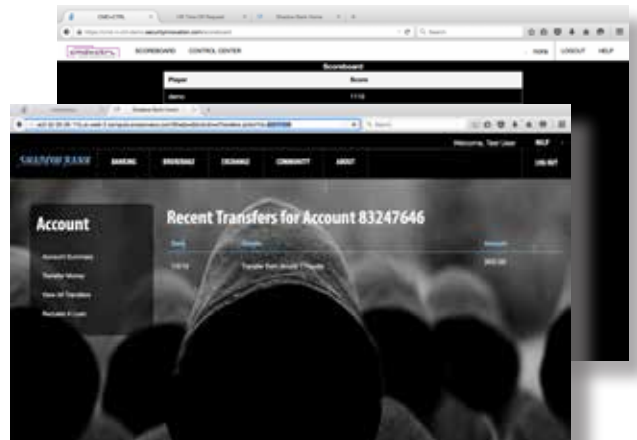

"In one word - AWESOME!" *- Janet Levesque, former CISO of RSA Security*
