

# CMD+CTRL

BUILD SECURITY SKILLS IN AN EXCITING NEW WAY

Unique in the industry, CMD+CTRL is an immersive learning environment where staff exploit their way through hundreds of vulnerabilities that lurk in business applications today – and learn quickly that attack and defense is about thinking on your feet.

## SO REAL IT'S...WELL, REAL!

Unlike gamification that mimics how an application should respond, CMD+CTRL comprises real websites, traffic, technologies, and vulnerabilities that represent actual application behavior. This unmatched realism brings the immediate gratification and long-term memory benefits of “learning by doing”. Not to mention it’s fun, so no strong-arming is needed.

*“Tell me and I forget.  
Teach me and I remember.  
Involve me and I learn.”*  
- Benjamin Franklin

## FEATURES & BENEFITS

### Authentic

Six fully-featured applications encourage players to “follow their nose” and practice situational awareness just as an attacker would

### Engaging

Real-time scoring, Easter eggs, and other surprises transform players from passive participants to determined competitors

### Ideal for All Skill Levels

Quick start guides, hints, and challenges of varying complexity ensure everyone can participate

### Flexible Delivery

Have our security engineers on hand for expert guidance and break-out sessions, or run it yourself (don't worry, we'll train you!)

### Measure Staff Proficiency

Detailed reports identify skill gaps and measure improvement over time

### Friendly Competition & Collaboration

Work individually and compete head-to-head or team up with your peers for a broad scale assault to maximize skills development and scoring
